DETAILED ACTION

1. This office action is in response to communication filed on 8/9/2006.
2. Claims 14-19, 22-23, 73-84 are presented for examination.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 14-17, 73-79, 81-84 are rejected under 35 U.S.C. 102(b) as being anticipated by Cohen (6,236,330 hereinafter Cohen).**

With respect to claims 14, 73-74, 76, 77, 83, 84 Cohen teaches a method of providing video or still image advertisements at selected locations on a network of multiple display screen that are located in traffic areas (Abstract). Providing advertising customers the opportunity to electronically order display of advertising content at display screen locations selected by the advertising customers via an electronic advertising customer interface (i.e. advertiser 28 access a station via a web site to order a message content and schedule a display)(col. 5, lines 5-12); receiving advertising content from the advertising customers (col. 5, lines 5-12); transmitting advertising content received from the advertising customers to the selected display screen locations (see display 14); driving the display screen at each selected location to display the transmitted advertising content in accordance with the advertising customers' orders (see col. 3, lines 48-52 and col. 4, lines 60-65).

Art Unit: 3622

With respect to claim 75, Cohen further teaches generating a bill in accordance with the order (col. 5, lines 24-32).

With respect to claim 78, Cohen further teaches sending the advertising content to the selected display screens using wireless communications (col. 3, lines 34-39).

With respect to claims 79, and 81-82, Cohen further recites any of a variety of known electronic driven changeable displays, including LED, liquid crystal displays (col. 3, lines 53-65).

With respect to claims 15-17, Cohen further teaches verifying the display for appropriateness of the time and content of the display (col. 4, lines 60-65).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claims 22-23, 80 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen in view of Official Notice.**

Claims 22-23 further recite detecting defective pixels on the display and automatically calibrating the defective pixels. Official notice is taken that it is old and well known in the imaging arts to detect and automatically calibrate the defective pixels in order to improve the image.

Claim 80 further recites that the advertising customer being an owner of the display screen. Official notice is taken that it is old and well known for the advertisers to own the bulletin or poster where they place their ads. For example, supermarkets and the like post their announcements on their bulletin board in order to save money on advertisements costs. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included the advertising customer being an owner of the display screen in order to obtain the above mentioned advantage.

7. Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen in view of Cragun (5,504,675 hereinafter Cragun).

Claims 18-19 further recite detecting customer traffic near the selected display locations and generating market analysis report from the detection of traffic. Cragun teaches collecting data pertaining to the proximity of persons around a presentation unit display and using the collected data to further run sales promotion programs (Abstract). It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included detecting customer traffic near the selected

display locations and generating market analysis report from the detection of traffic in order to obtain the above mentioned advantage.

Response to Arguments

8. Applicant's arguments with respect to claims 14-19, 22-23, 73-84 have been considered but are moot in view of the new ground(s) of rejection.
